

# THE UNIQUE PROPERTY OF NORTHERN BC

## 3.1 ITINERARY

We are very excited to introduce BC Bike Ride to Northern British Columbia. It is the new frontier for destination mountain biking and with that we are celebrating a new era of diversity in purpose built mountain bike trails in our province. Almost every town has a stash of handbuilt singletrack to explore.

**William's Lake** offers 200 km of purpose built singletrack within city limits and another 100+ km within a 30 minute drive with everything from epic cross-country to steep and gnarly downhill. It's also home to the largest bike park in the Interior with 10 acres of jumps, drops, and log work; riders are sure to be entertained.

**Prince George** is the traditional home of the Lheidli T'enneh and Carrier Sekani First Nations people. From Pidherny to the Otway and Heritage River trails, Prince George offers a wide variety of cross-country, all-mountain, and downhill riding experiences.

**Burns Lake** offers a progressive beginner-to-advanced trails network designed by world-renowned experts including the IMBA trail crew, Gravity Logic and Jay Hoots, as well as a local trail crew. It offers a rider-focussed sequence of cross-country, freeride and downhill trails, as well as a skills park, jump park and Rider Cross track, all just ten minutes from downtown on Boer Mountain.

**Smithers** lies in the beautiful Bulkley Valley – a prime mountain biking location surrounded by forested hillsides, stunning alpine meadows and rugged mountain peaks. The area offers everything from wide-open pathways to historical mining roads, alpine singletrack, and steep, technical freeride trails.

**Terrace** has become increasingly popular as a destination for mountain biking. With a core group of riders who are dedicated to building maintaining trails in the area, both Terrace and the nearby suburb of Thornhill offer hundreds of trails to explore.
